

CLAIMS (AS CURRENTLY PENDING):

1. A trailer comprising:
 - a frame having a front transverse support member and pivotable front support member;
 - the pivotable front support member operable to move from a first position to a second position;
 - a platform pivotably mounted on the frame, the platform having an upper surface;
 - the platform operable to move from a first position where the upper surface is approximately horizontal, to a second position where the upper surface is angled upwardly and its rear edge is supported on an underlying surface; and,
 - the platform supported in its second position at its front portion by the pivotable front support member in its second position where the front support member has a first end in contact with a platform front portion and a second end resting on an underlying surface.
2. A trailer according to claim 1 wherein the platform further comprises at least one longitudinal member supporting the upper surface.
3. A trailer according to claim 1 wherein the platform upper surface is concave.
4. A trailer according to claim 1 wherein the front support member first position includes the front support member being parallel to the platform in its first position.
5. A trailer according to claim 1 wherein the front support member in its second

position is generally perpendicular to the platform in its second position.

6. A trailer according to claim 2 wherein at least one longitudinal member includes an elongated lower surface that is parallel to an underlying surface when the platform is in its second position.

7. A trailer according to claim 1 further comprising:
a pair of wheels mounted on the frame, the wheels having a first position in contact with an underlying surface when the platform is in its first position, and a second position above an underlying surface when the platform is in its second position.

8. A trailer according to claim 1 wherein the upper surface comprises a vehicle ramp adapted to launch a vehicle into the air when in its second position.

9. A trailer according to claim 1 wherein the upper surface comprises a vehicle transport surface when in its first position.

10. A trailer according to claim 1 wherein the front support member includes a transverse member and left and right longitudinal members connected to respective left and right portions of the transverse members, and the left and right transverse members pivotably mounted to respective left and right portions of the frame.
